

allCommentDates()

This function returns a number list of the dates (or timestamps) of related comments.

Syntax

```
allCommentDates() #Output: Number list
```

Examples

Parser expression	Description
<code>allCommentDates()</code>	This example returns all dates (timestamps) comments were added to the current issue, e.g.: 1605712204125, 1605712204845
<code>first(allCommentDates())</code>	This example returns the timestamp of the most recent comment , e.g.: 1605712204854 To achieve this, the following functions are used: <ul style="list-style-type: none">• first()

Output

This function returns a NUMBER LIST

Variant where you can additionally define **issue keys**.

Syntax

```
allCommentDates(issueKeys) #Output: Number list
```

Examples

Parser expression	Description
<code>allCommentDates("SW-1, SW-2")</code>	This example returns a number list with the timestamps of the comment dates for issues with the key SW-1 and SW-2 , e.g.: 1605712204125, 1605712204845

Additional information

Parameters used in this function

Parameter	Input (data type)	Description
issueKeys	TEXT	A text containing issue keys as a comma-separated list.

Output

This function returns a **NUMBER LIST**

Variant where you can additionally define specific issues in an **issue list**.

Syntax

```
allCommentDates(issueList) #Output: Number list
```

Examples

Parser expression	Description
<pre>allCommentDates(issuesFromJQL("project = CRM"))</pre>	This example returns a number list with all the comment dates for all issues in the project CRM .

Additional information

Parameters used in this function

Parameter	Input (data type)	Description
issueList	ISSUE LIST	Any given issue list. Usually this value is retrieved from a function (e.g. linkedIssues() or subtasks()).

Output

This function returns a **NUMBER LIST**

Use cases and examples

Use case
