filledInTransitionScreen()

This function returns **`true`** only if the selected field has been populated in the current transition screen and **did not** have a value before.

Syntax
`filledInTransitionScreen(fieldCode) #Output: Boolean`

Examples

Parser expression	Description
`filledInTransitionScreen(% {issue.assignee})`	This example returns **true** only if the field **Assignee** was present in the transition screen and contained a value at the moment of submitting the form.
