Attachments (only new attachments will be added)

Field code
`%{issue.attachmentsAdd}`

Write

Valid text input	Comma- or blank-separated **list of issue keys**
Valid numerical input	
Example input	`CRM-2`, `HR-34`, `HR-50`

Adds all attachments retrieved from **specified** issues to the current issue. **Duplicate** attachments will be **discarded**.

This field can only be updated under **certain** circumstances. The most common examples are:

- Update or copy field values post function for **workflows**
- Update field action for **automation rules**

Input	Description
CMR-1	**Adds** all attachments from issue CRM-1 to the current issue, **unless they already exist**.
CRM-2, HR-34, HR-50	**Adds** all attachments from CRM-2, HR-34 and HR-50 to the current issue, **unless they already exist**.

If you want to **replace** the current attachments, see Attachments (current attachments will be replaced).
