Available target statuses

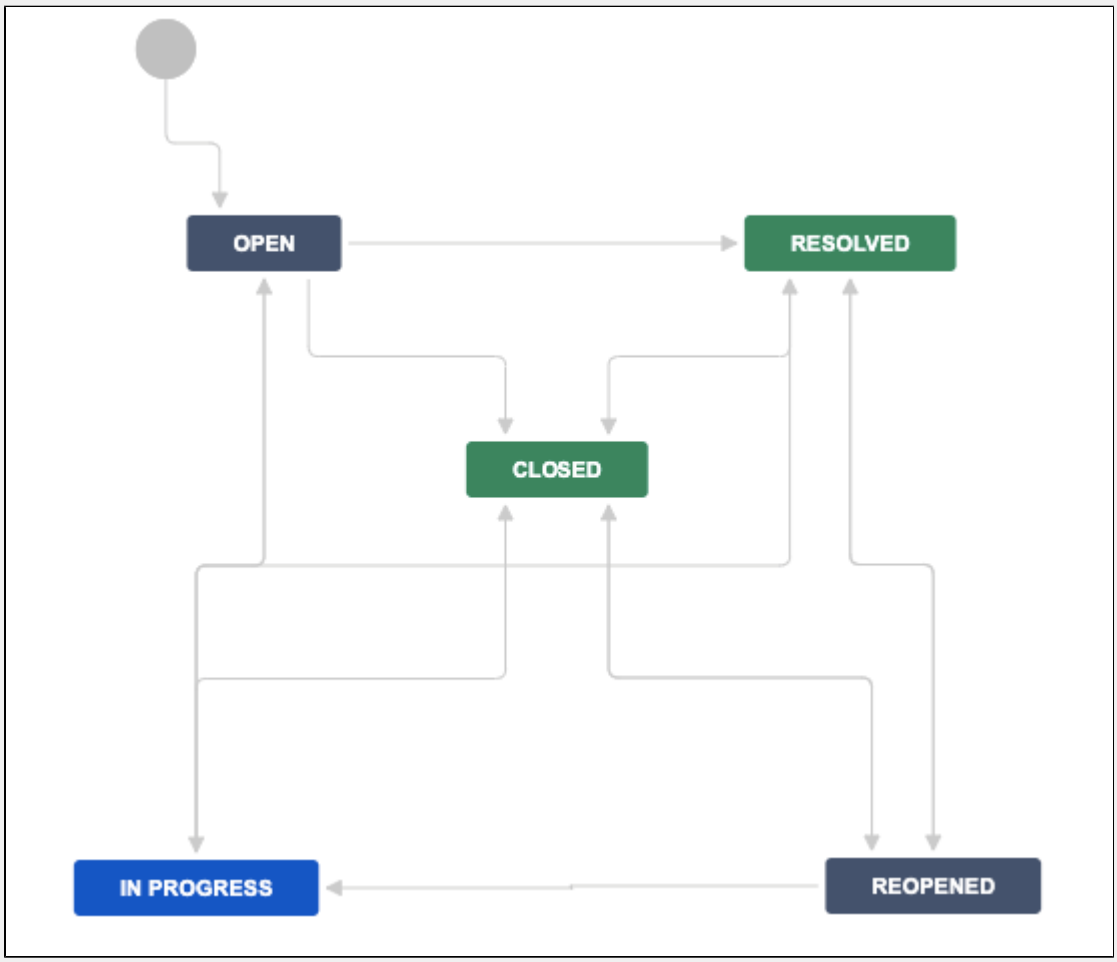
Field code
`%{issue.status.achievable}`

Read

Returned value	Comma-separated **list of status names**
Output data type	TEXT
Example output	In Progress, Resolved, Closed

Returns the **names of available target statuses**, depending on the available transitions of the current **issue status**.

Example:



Input	Description
The current issue status is **Open**	The output will be: **In Progress, Resolved, Closed**
The current issue status is **Reopened**	The output will be: **In Progress**
