

Available transitions

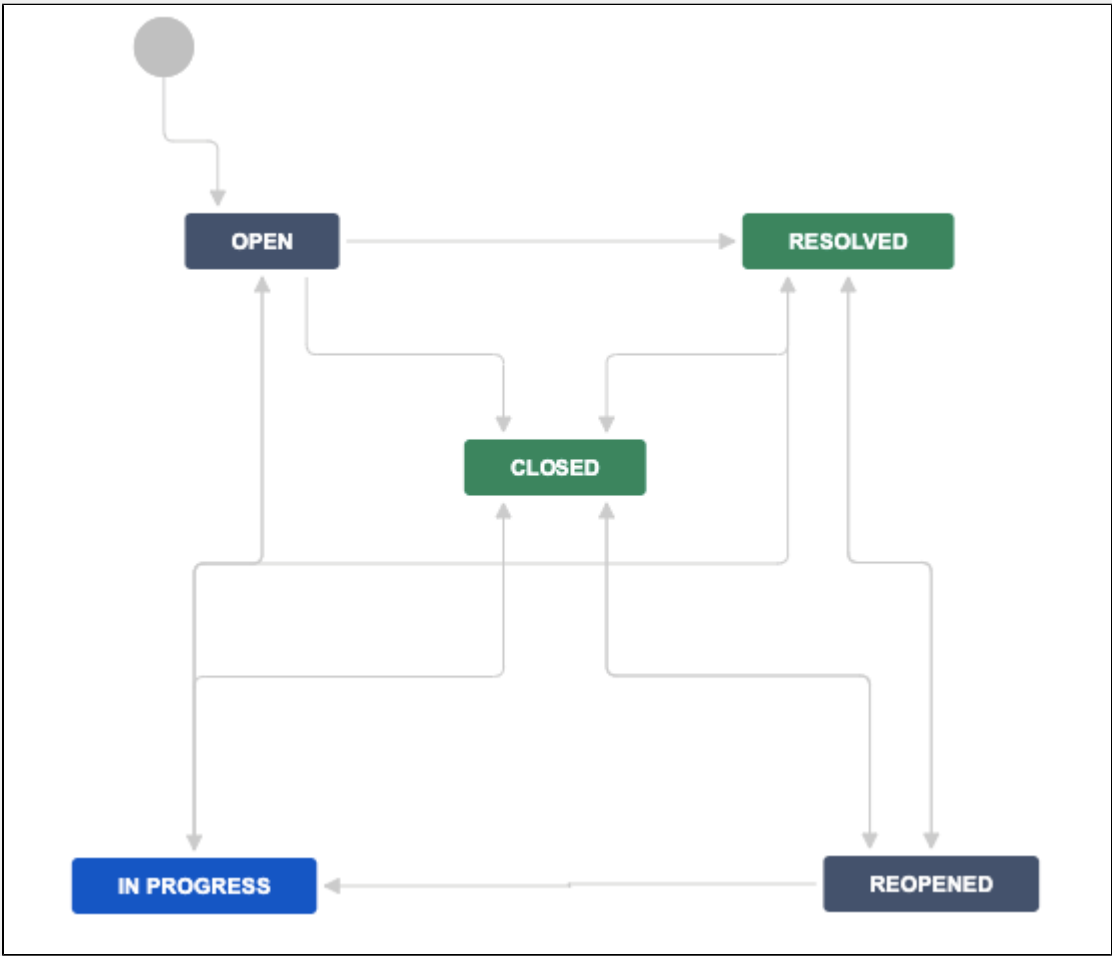

Field code
<code>%{issue.transition.achievable}</code>

 Read

Returned value	A comma-separated list with transition names
Output data type	TEXT
Example output	Start Progress, Resolve Issue, Close Issue

Returns the **names of available transition**, depending on the current **issue status**.

Example:

Input	Description
The current issue status is Open	The output will be: Start Progress, Resolve Issue, Close Issue
The current issue status is Reopened	The output will be: Start Progress
