Execute transition (delayed execution)

This field code is **deprecated**. Instead of transitioning an issue by writing to this field, please use one of the following methods instead:

- Transition issue post function for **workflows**
- Transition issue action for **automation rules**

Write

Valid text input	**Name** of a **transition**
Valid numerical input	
Example input	Start Progress

You can use this virtual field to trigger a transition, provided conditions and validators are matched, and the transition is available for current status.

This field can only be used in the Update issue fields post function.
