Reporter

Field code
`%{issue.reporter}`

Read

Returned value	**User name** of the **reporter**
Output data type	TEXT
Example output	admin.istrator

Write

Valid text input	A valid **username**
Valid numerical input	
Example input	admin.istrator

The input has to be a valid **user name** (not user's full name).

The value can be retrieved from multiple **sources** and other **user picker** field codes.

Alternatively check out the functions related to Users, groups and roles.
