# Field codes (read-only)

This page lists all available field codes for **read-only** fields.

Some of those fields are **virtual fields** or **system fields** which can only be used in JWT.

| Field name | Field code | Example output | Output data type | Label |
|---|---|---|---|---|
| Action response | `%{action.response}` | `{"self": "https://your-domain.atlassian.net/jira/rest/api/3/project/10042","id": 10010,"key": "PROJ"}` | TEXT | |
