

Project lead's email (trigger)

Field code

```
%{trigger.project.leadEmail}
```

Read

Returned value	Email address of the project lead of the project triggering the event
Output data type	<div>TEXT</div>
Example output	user@example.com

This field code is **only available** for [JWT automation rules](#) since several events can trigger the execution of a rule.

Automation-only field codes can additionally retrieve information from the trigger event (e.g. the version being updated, the user triggering the event, etc.)
