Component lead

Field code
`%{trigger.component.lead}`

Read

Returned value	**User name** of the **component lead** of the component triggering the event
Output data type	TEXT
Example output	admin.istrator

This field code is **only available** for JWT automation rules since several events can trigger the execution of a rule.

Automation-only field codes can additionally retrieve information from the trigger event (e.g. the version being updated, the user triggering the event, etc.)
