

# Version released

Field code
<code>%{trigger.version.released}</code>

Read

Returned value	Release status of the version triggering the event
Output data type	<div>TEXT</div>
Example output	true, false

This field code is **only available** for [JWT automation rules](#) since several events can trigger the execution of a rule.

**Automation-only** field codes can additionally retrieve information from the trigger event (e.g. the version being updated, the user triggering the event, etc.)
