

User name

Field code
<code>%{trigger.user.name}</code>

Read

Returned value	User name of the user triggering an event
Output data type	TEXT
Example output	admin.istrator

This field code is **only available** for [JWT automation rules](#) since several events can trigger the execution of a rule.

Automation-only field codes can additionally retrieve information from the trigger event (e.g. the version being updated, the user triggering the event, etc.)
