

# User email

Field code
<code>%{trigger.user.email}</code>

Read

Returned value	Email address of the <b>user</b> triggering the event
Output data type	<input type="text" value="TEXT"/>
Example output	user@example.com

This field code is **only available** for [JWT automation rules](#) since several events can trigger the execution of a rule.

**Automation-only** field codes can additionally retrieve information from the trigger event (e.g. the version being updated, the user triggering the event, etc.)
