

## Project lead's email (trigger)

### Field code

```
%{trigger.project.leadEmail}
```

Read

|                  |  |
|------------------|--|
| Returned value   | Email address of the <b>project lead</b> of the project triggering the event |
| Output data type | <input type="text" value="TEXT"/>  |
| Example output   | user@example.com   |

This field code is **only available** for [JWT automation rules](#) since several events can trigger the execution of a rule.

**Automation-only** field codes can additionally retrieve information from the trigger event (e.g. the version being updated, the user triggering the event, etc.)
