

# usersInGroup()

This function returns the **user names** of active users in a given group.

Multiple groups can be specified in a comma-separated list of group names, returning the users that belong to any of the groups.

## Syntax

```
usersInGroup(group) #Output: Text list
```

## Examples

Parser expression	Description
<code>toString(usersInGroup("jira-developers"))</code>	This example returns the user names of all users in the <b>jira-developers</b> group, e.g.: <b>b.smith, a.grant, admin.istrator</b>

## Additional information

Parameters used in this function

Parameter	Input (data type)	Description
group	TEXT	Text containing a valid Jira group.

## Output

This function returns a TEXT LIST
