

Due date

Field code
<code>%{issue.dueDate}</code>

 Read

Returned value	Due date (with no additional time part)
Output data type	TEXT
Example output	19/Mar/20

When cast to text, the output depends on the `jira.date.time.picker.java.format` parameter set in your Jira instance.

19/Mar/20 would be returned for `dd/MMM/yy h:mm a`

 Write

Valid text input	A date or date-time value in a specific format 
Valid numerical input	Number of minutes relative to current time
Example input	2020-01-31 14:35

The allowed date-time format is defined at `jira.date.time.picker.java.format`

Additionally you can use the formats allowed in JQL queries:

- `yyyy/MM/dd HH:mm`
- `yyyy-MM-dd HH:mm`
- `yyyy/MM/dd`
- `yyyy-MM-dd`
- or relative to current time using "w" (weeks), "d" (days), "h" (hours), or "m" (minutes).

If you want to return a **number** (a timestamp) instead, **remove** the leading `%` character in front of the field code.

You will **not** be able to do this in the **basic mode**. Learn more about [Parsing modes](#).
