

# Project key (trigger)

## Field code

```
{trigger.project.key}
```

Read

Returned value	Key of the <b>project</b> triggering the event
Output data type	TEXT
Example output	CRM, HR, SDESK

This field code is **only available** for [JWT automation rules](#) since several events can trigger the execution of a rule.

**Automation-only** field codes can additionally retrieve information from the trigger event (e.g. the version being updated, the user triggering the event, etc.)
