

# Version release date

## Field code

```
%{trigger.version.releaseDate}
```

Read

Returned value	Release date of the <b>version</b> triggering the event
Output data type	<input type="text" value="TEXT"/>
Example output	2020-02-17 07:46

When cast to text, the output depends on the `jira.date.time.picker.java.format` parameter set in your Jira instance.

**19/Mar/20 1:38 PM** would be returned for `dd/MMM/yy h:mm a`

This field code is **only available** for [JWT automation rules](#) since several events can trigger the execution of a rule.

**Automation-only** field codes can additionally retrieve information from the trigger event (e.g. the version being updated, the user triggering the event, etc.)
