User directory user

Field code
%{trigger.user.directoryUser}

Read

Returned value	**User name** from the **directory** of the **user** triggering the event
Output data type	TEXT
Example output	admin.istrator

This field code is **only available** for JWT automation rules since several events can trigger the execution of a rule.

Automation-only field codes can additionally retrieve information from the trigger event (e.g. the version being updated, the user triggering the event, etc.)
