Field codes (automation-only)

This page lists all field codes, which are **only** available in JWT automation rules.

These fields can be used to retrieve values from the event or action which is **triggering** the execution of the rule.

Example of am automation-only field code

Field code	Context	Description
%{trigger.project.description}	`trigger`	The **description** of the project **triggering** the automation rule.

The `trigger` prefix (or context) can be used in various places in automation rules. Other simple field codes, such as **`%{issue.assignee}`** can also be changed to **%{trigger.issue.assignee}** to retrieve the **assignee** from the **issue triggering** the automation rule.

The field codes listed on this page, however, are **only valid** in the context of automation rules and depend on the type of Automation triggers.

Field name	Field code	Example output	Output data type	Label
Component default assignee	`%{trigger.component.defaultAssignee}`	admin.istrator	TEXT	
Component description	`%{trigger.component.description}`	This is a component	TEXT	
Component ID	`%{trigger.component.id}`	10000	TEXT	
Component lead	`%{trigger.component.lead}`	admin.istrator	TEXT	
Component name	`%{trigger.component.name}`	Customer Relationship Management Component	TEXT	
Project category (trigger)	`%{trigger.project.category}`	Archive	TEXT	
Project description (trigger)	`%{trigger.project.description}`	This is the CRM project	TEXT	
Project key (trigger)	`%{trigger.project.key}`	CRM, HR, SDESK	TEXT	
Project lead's email (trigger)	`%{trigger.project.leadEmail}`	user@example.com	TEXT	
Project lead's full name (trigger)	`%{trigger.project.leadDisplayName}`	Bob Smith	TEXT	
Project lead (trigger)	`%{trigger.project.lead}`	admin.istrator	TEXT	
Project name (trigger)	`%{trigger.project.name}`	Customer Relationship Management	TEXT	
Project URL (trigger)	`%{trigger.project.url}`	https://www.decadis.de/x	TEXT	
User directory ID	`%{trigger.user.directoryId}`	10001	TEXT	

User directory user	`%{trigger.user.directoryUser}`	admin.istrator	TEXT
User email	`%{trigger.user.email}`	user@example.com	TEXT
User full name	`%{trigger.user.fullName}`	Bob Smith	TEXT
User ID	`%{trigger.user.id}`	10000	TEXT
User is active	`%{trigger.user.isActive}`	true, false	TEXT
User key	`%{trigger.user.key}`	admin.istrator	TEXT
User name	`%{trigger.user.name}`	admin.istrator	TEXT
Version archived	`%{trigger.version.archived}`	true, false	TEXT
Version description	`%{trigger.version.description}`	This is version 1.0	TEXT
Version ID	`%{trigger.version.id}`	10000	TEXT
Version name	`%{trigger.version.name}`	Version 1.0	TEXT
Version project	`%{trigger.version.project}`	CRM	TEXT
Version project ID	`%{trigger.version.projectId}`	10000	TEXT
Version released	`%{trigger.version.released}`	true, false	TEXT
Version release date	`%{trigger.version.releaseDate}`	2020-02-17 07:46	TEXT
Version sequence	`%{trigger.version.sequence}`	1	TEXT
Version start date	`%{trigger.version.startDate}`	2020-02-17 07:46	TEXT
