Number of days an issue was in the Open status against a JWT calendar

Use case

This calculated field returns the **number** of **days** an issue was in the **"Open"** status considering the configured JWT calendar.

Sconfiguration

Assumption: A custom JWT calendar called "my_calendar" has been defined as follows:

Create a new Calculated Number Field (by JWT) custom field and name it properly.

Providing a description will help you to identify what the custom field does but this step is optional.

1

Parser expression

Add the following expression:

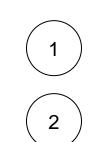

Math expression for Calculated Number field:

```
timeInStatus("Open", "my_calendar", LOCAL) / {DAY}
```

more info...

Apart from a time macro, the following functions are used:

• timeInStatus()

Content type

Choose Number

Number format pattern

Choose

days

Check the parameter Uninitialized when calculated value is zero

3

Add the field to the relevant view screens.

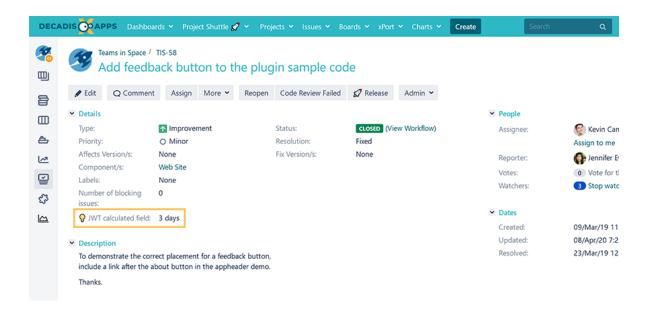

Remember: All calculated fields are read-only and cannot be manually updated on a create or edit screen.

Check the results

Once configured and added to an issue screen (a parent issue), the result will look like this:

Default Configuration Scheme for JWT cale	culated field
Default configuration scheme generated by Jira	
Applicable contexts for scheme:	Edit Configuration
	Issue type(s):
	Global (all issues)
Expression:	✓ 123 timeInStatus("Open", "my_calendar", LOCAL) / {DAY}
	Edit expression
Display format:	Number with the following format: ### days.
	Field will be considered as $uninitialized$ (i.e. will return <code>null</code>) when calculated value is $z_{\rm f}$ Edit display format
