

# Grouped Filter Results gadget

## What does this gadget offer?

The **Grouped Filter Results** gadget can be used to calculate sums of multiple fields while the source issues are **grouped** by one custom field.

Grouped Filter Results (by sumUp): Let's have some groups!			
Priority	Time Spent	Remaining Estimate	Issues
 Highest	225.5h	0 minutes	2
 Critical	224h	3 days	19
 Major	1133.83h	2 weeks, 5 hours, 10 minutes	86
 Medium	69h	0 minutes	2
 Minor	81.33h	2 hours, 30 minutes	12
Σ	1733.67h	2 weeks, 3 days, 7 hours, 40 minutes	121

## Configuration

### Gadget Title

Add a **custom title** to the gadget for **easier identification**. If nothing is set, the title will be generated by combining the gadget name and the selected filter/ JQL.

### Issue filter

Select whether you want to use a **predefined JQL Filter** or a **custom JQL** to get the issues.

### Fields to display

Add **fields** to be displayed as **columns** and reorder them using **drag** and **drop**.

The **sum/ average** of a field will only be displayed, if a **calculation rule** has been created.

If there are multiple calculation rules for a single field, they all are selectable from the dropdown list.

The field name will be written in **parentheses behind the rule name**.

Av **Story** Points (Story Points)

Ø **Story** Points (Story Points)

Σ **Story** Points (Story Points)

## Group By

Select a field that will be used to **group** the **results** on the **Y-axis**.

### Grouping by name instead by ID

SINCE VERSION 3.6.0

When selecting one of the following fields, it is possible to group by their name instead of the ID:

- Version fields (Affected version, Fix version)
- Components field
- Option select custom fields

By **default**, the values will be **grouped by their ID**, meaning that there might be several options that have the same name (e.g. 2 components from different projects) but since they don't have the same ID in the database, they will be treated as two different values.

When **checking the checkbox**, options with the **same value will be treated as one option**, even though they are saved as different values in the database.

Group By

Component/s

Group results by project, custom field, etc...

Group strategy

☐

Group by name

Select this option to group elements by name instead of their ID.

## Number of Results

Choose how many results you want to display on your dashboard.

## Refresh Interval

Specify how often the gadget should be refreshed.

If **Never** is selected, the gadget will only be refreshed on page reload.
