Jira Software Boards

On this page

Available boards | Enable/ disable the calculation row | Permanent calculation

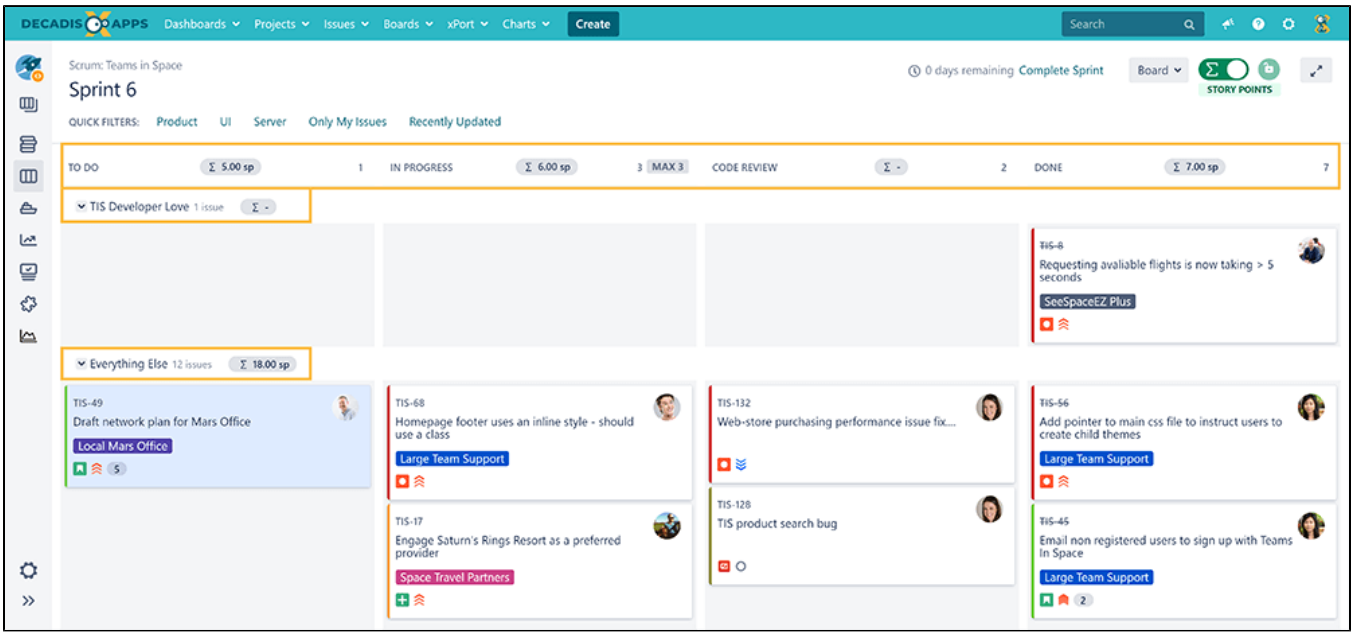

SINCE VERSION 3.5.0

Since version **3.5.0** it is possible to calculate values in **Kanban and Scrum Boards!**

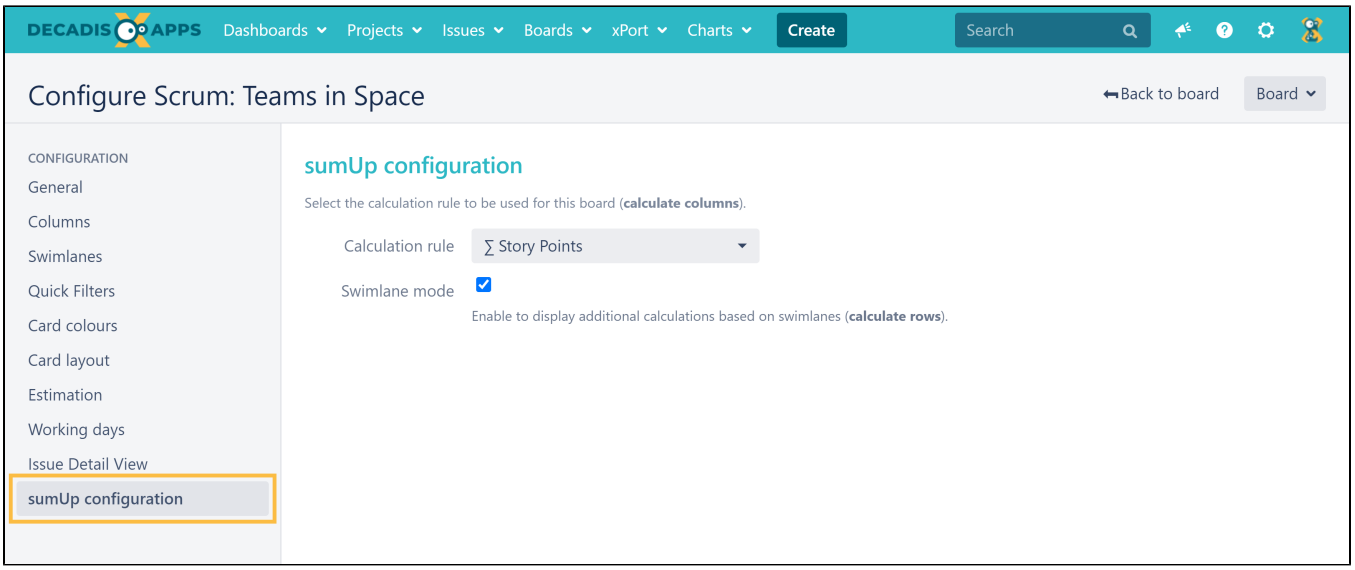

Available boards

Scrum boards

In Scrum Boards it is possible to activate the calculation per column and swimlanes:

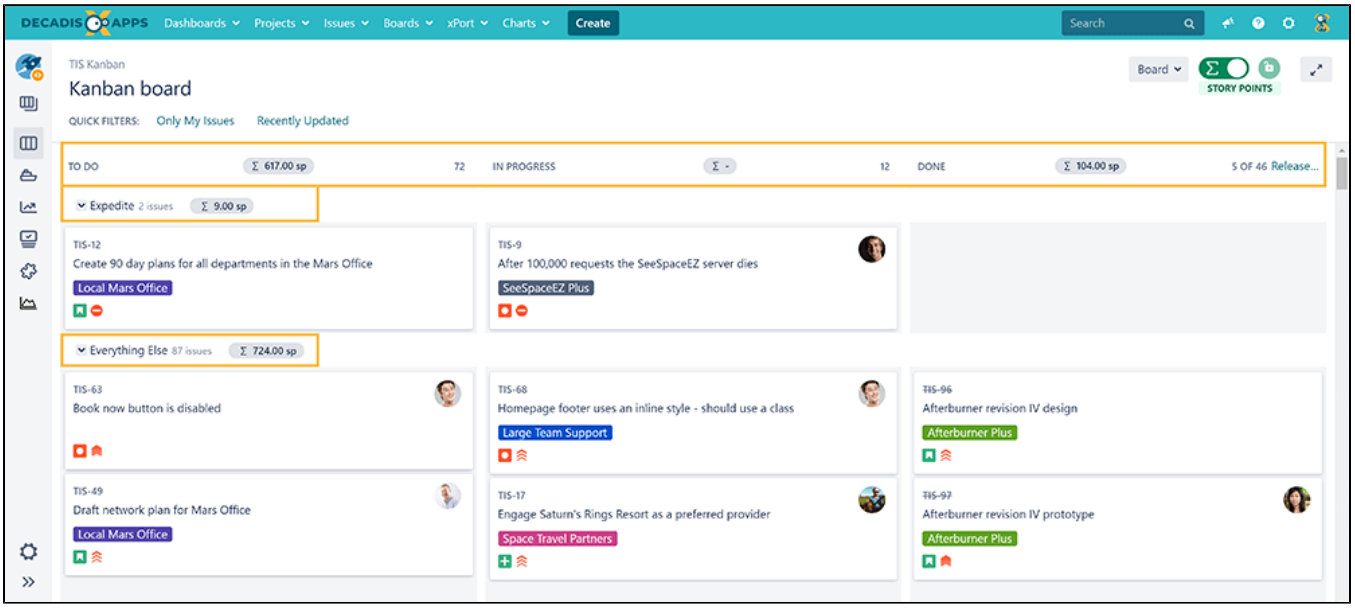

The calculation can be configured by going to the **board configuration sumUp configuration**:

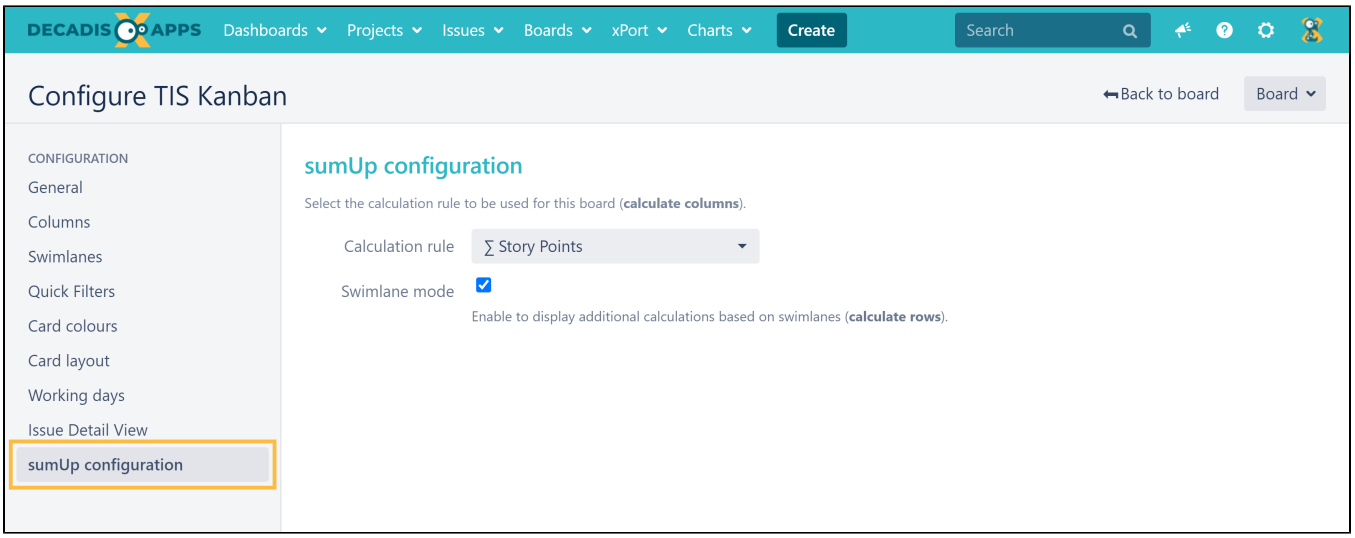

Kanban boards

In Kanban Boards it is possible to activate the calculation per column and swimlanes:

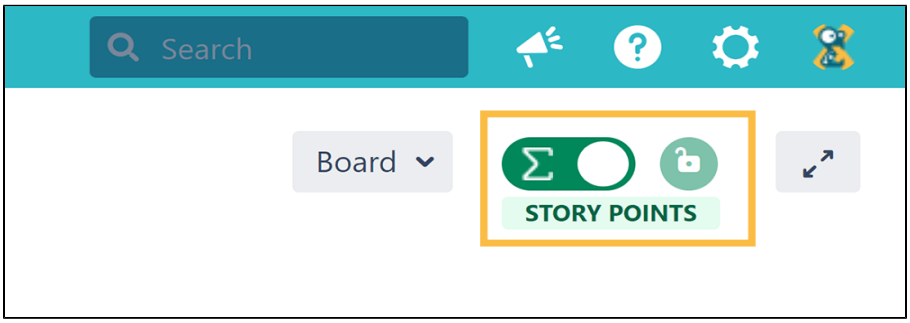

The calculation can be configured by going to the **board configuration sumUp configuration**:

Enable/ disable the calculation row

The calculation can be activated in the upper right corner:

If **sumUp is not configured** or activated for the board, the **buttons won't be displayed!**

In this case, please check the configuration like described above or check that sumUp is activated for Jira Software **and** the project of interest within **sumUp's global settings** .

Permanent calculation

If the **permanent calculation is not activated**, the **calculation** will be **disabled** every time the page/ board reloads.

To **keep the calculation activated** after page/board reloads, the **permanent calculation** can be activated by hitting the lock button next to the toggle button in the upper right corner.
