Issue Navigator

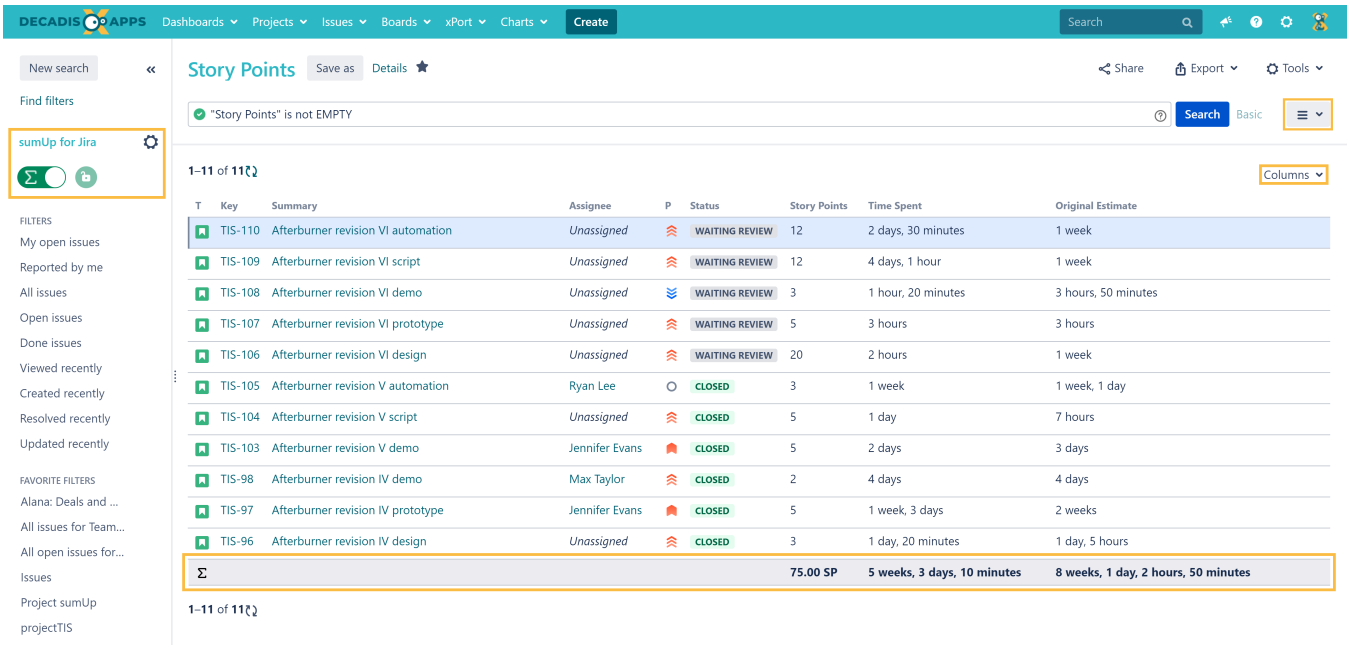

On this page

Enable/ disable the calculation row | Permanent calculation | Activating the calculation row in Jira's Filter Result gadget | | |

sumUp can be used within the **Issue Navigator** to display a calculation row at the bottom of the issue list.

When activated, a result will be displayed for each field in the navigator that has a calculation rule configured.

If no calculation rules are configured, the calculation row won't be displayed. Also select List View and select the correct Columns.

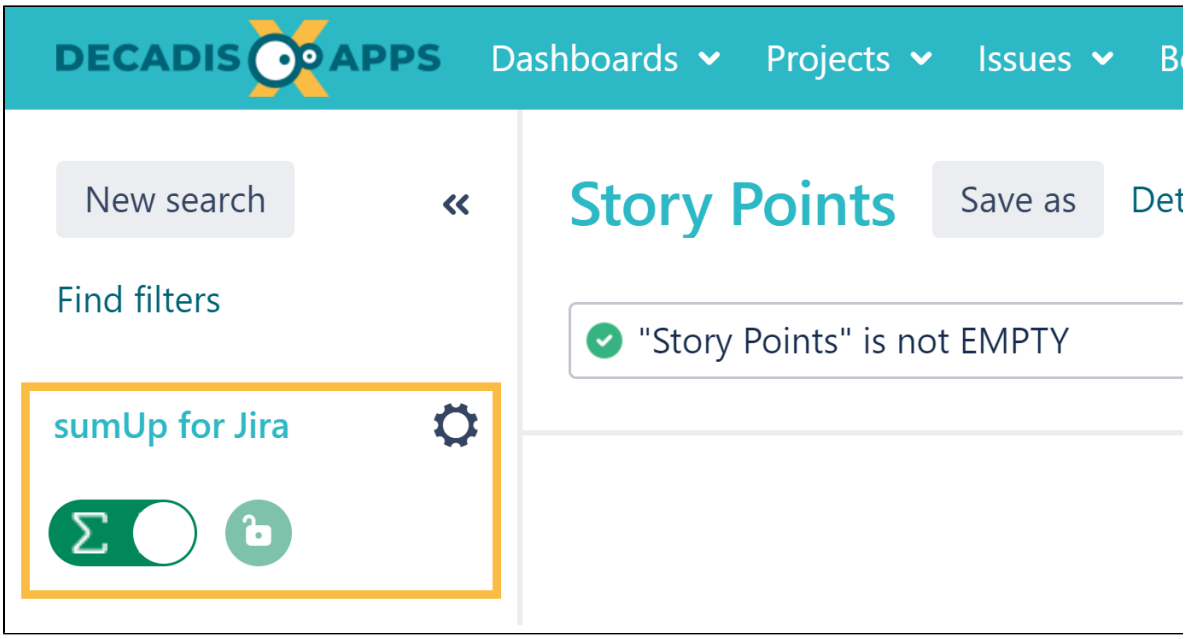

Enable/ disable the calculation row

If **sumUp is not activated** for Jira Core within **sumUp's global settings** under "Manage apps", the **buttons won't be displayed!**

1

When heading to the Issue Navigator, the calculation row can be **activated** by clicking the **toggle button** in the **upper left corner**.

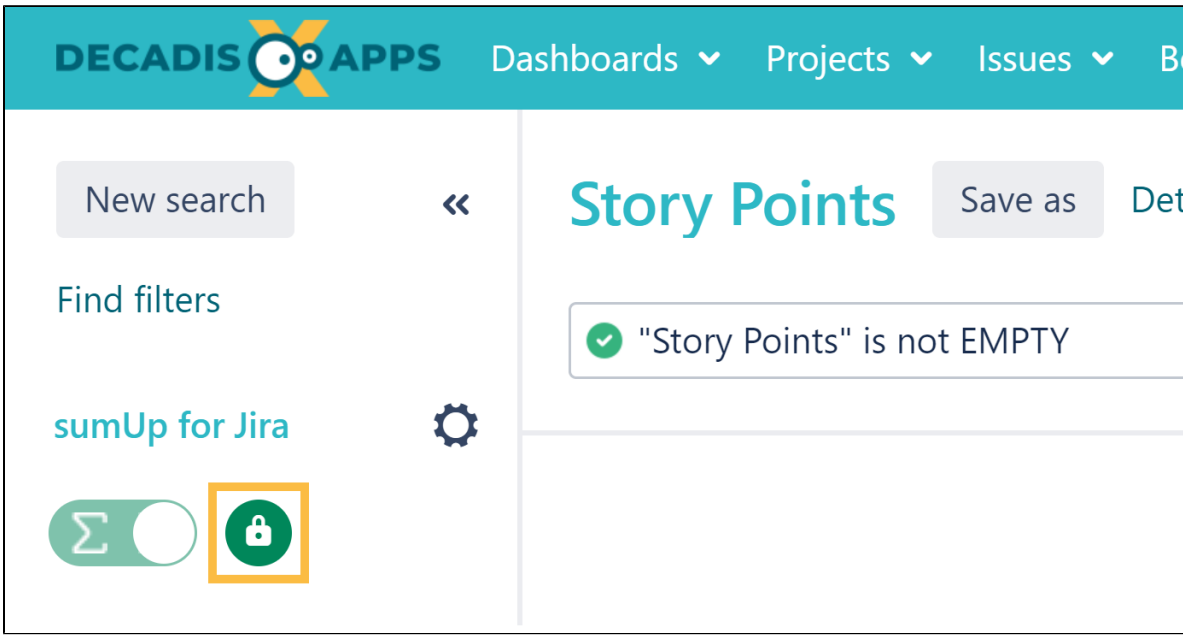

Permanent calculation

If the **permanent calculation is not activated**, the calculation row will be **removed** every time the page reloads.

1

To **keep the calculation row activated** after page reloads, the **permanent calculation** can be activated by hitting the button next to the toggle button in the upper left corner:

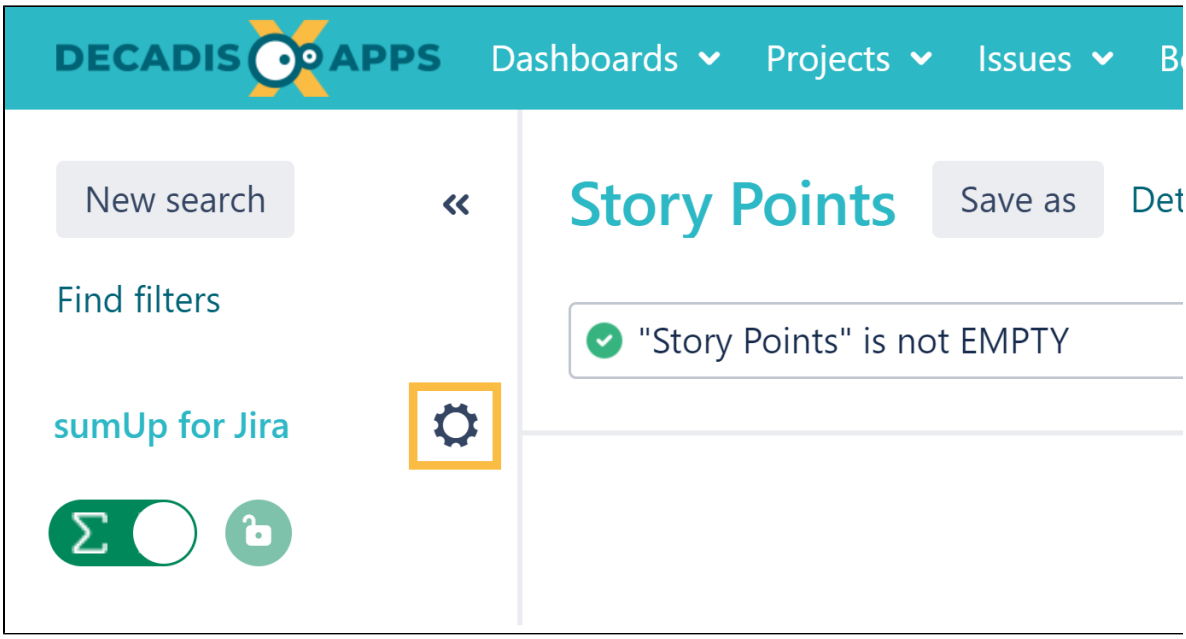

Activating the calculation row in Jira's Filter Result gadget

By default, the calculation row won't be displayed in the filter results gadget.

It has to be **manually activated** for the filter used in the gadget.

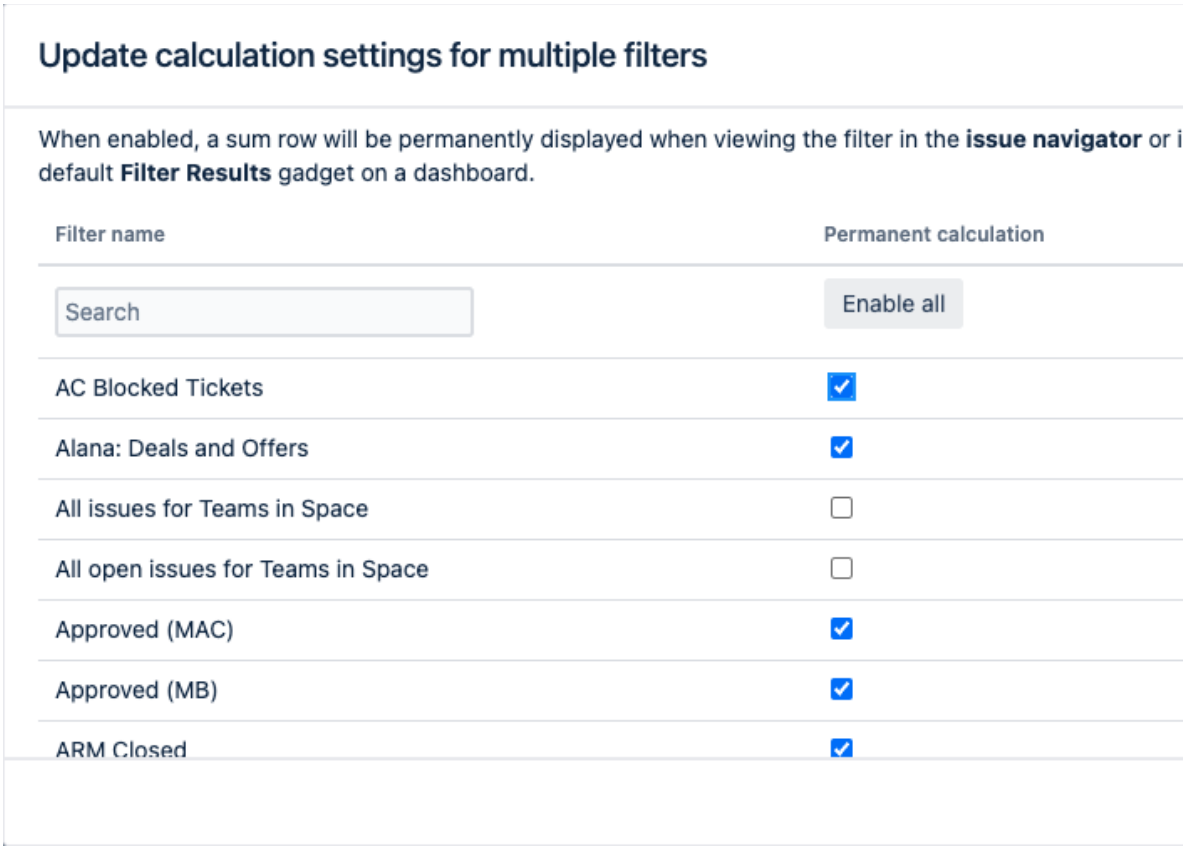

1

To activate the calculation row for the filter used in the gadget, head over to the **Issue Navigator** and click on the **cogwheel** in the upper left corner.

2

In the opening modal, select the filter the calculation row should be displayed for:

3

When now using one of the selected filters in the gadget, the calculation row will be displayed and should look like this:

Filter Results: Story Points

T	Key	Summary	P	Story Points
	TIS-110	Afterburner revision VI automation		12
	TIS-109	Afterburner revision VI script		12
	TIS-108	Afterburner revision VI demo		3
	TIS-107	Afterburner revision VI prototype		5
	TIS-106	Afterburner revision VI design		20
	TIS-105	Afterburner revision V automation		3
	TIS-104	Afterburner revision V script		5
	TIS-103	Afterburner revision V demo		5
	TIS-98	Afterburner revision IV demo		2
	TIS-97	Afterburner revision IV prototype		5
