

Permission management

Within sumUp several **permissions** for individual **users or groups** can be set.

By default, any logged-in user can access sumUp.

The screenshot shows the sumUp Administration interface. The top navigation bar includes 'DECADIS APPS', 'Dashboards', 'Projects', 'Issues', 'Boards', 'xPort', 'Charts', and a 'Create' button. A search bar is also present. The left sidebar lists various administration options, with 'Permissions' highlighted under the 'SUMUP' section. The main content area is titled 'sumUp Permissions' and includes a sub-header 'Define who can use sumUp in your Jira instance.' A blue information box states: 'If no restrictions have been defined, all users can use sumUp. If users have both been granted and denied access to sumUp (e.g. via group memberships or misconfiguration), they won't have access.' Below this, there are two sections: 'Grant access to' and 'Deny access from'. Each section has dropdown menus for 'Users' and 'Groups'. At the bottom of the configuration area are 'Save' and 'Cancel' buttons.

If a user **doesn't have any permissions** in sumUp, he won't be able to **view or edit** anything related to sumUp.

Even administrators won't be able to use sumUp without the sumUp permission.
