Display current issue's project category

This calculated field returns the project category of the issue's project.

Configuration

Providing a description will help you to identify what the custom field does but this step is optional

Parsing mode

Select Advanced text as parsing mode.

Parser expression

Add the following expression:

Text to be parsed for calculated text field:

%{issue.project.category}

Add the field to the relevant view screens.

Remember: All calculated fields are read-only and cannot be manually updated on a create or edit screen.

Check the results

Once configured and added to an issue screen, the result will look like this:

Related use cases
