Number of times a resolved issue has been rejected

Use case

This calculated field returns the number of times a resolved issue has been rejected.

To do so, we're counting the times the status is changed to "Rejected", but only when a resolution is set.

Remember: All calculated fields are read-only and cannot be manually updated on a create or edit screen.

Check the results

Once configured and added to an issue screen (a parent issue), the result will look like this:

| Default Configuration Scheme for JWT cal | culated field | | | | |
|--|--|--|--|--|--|
| Default configuration scheme generated by Jira | | | | | |
| Applicable contexts for scheme: | : Edit Configuration | | | | |
| | Issue type(s): | | | | |
| - · · · | Global (all issues) | | | | |
| Expression: | <pre>%{issue.resolution} != null ? count(timesOfTransition(' "Rejected")) : null</pre> | | | | |
| | Edit expression | | | | |
| Display format: | Number with the following format: ### times. | | | | |
| | Field will be considered as uninitialized (i.e. will return null) when calculated value is z_i Edit display format | | | | |
