

Assign issue to current user

On this page

[Configuration](#) | [Screenshots](#) | [Related use cases](#)

Use case

In the following use case the issue gets automatically **assigned** to the **current user**.

Configuration

1

Add the [Update or copy field values](#) post function to the desired transition or create a new transition.

2

Target issue

Choose **Current issue**

3

Fields

Choose **Assignee**

4

Value

In the **popup**, choose the value **Copy field value from current issue**

5

Field

Choose **Current user**

Screenshots

Update parameters of the Update or copy field values Function for this transition.

Update parameters of the Update or copy field values Function for this transition.

Basic configuration *

Define the required parameters needed to execute this post function.

Target issue *

Current issue

Select the issues to be updated.

Fields *

Define the fields to be updated.

Field	Value	Write protection
Assignee	Field in current issue	CURRENT USER
Add field		

- Additional options
- Conditional execution
- Run as

Update or copy field values

Documentation

Update one or multiple issue fields or copy field values across the same issue or related issues (parent / child, Epic / Story, linked issues and many more).

Workflow

JWT 3.0.0 Use cases

```
graph TD; A[TO DO] --> B[JWT (1471)]; B --> C[IN PROGRESS];
```

Examples

Pick one of the following example configurations and get started in no time. More details will be provided upon your selection.

- Assign issue to current user
- Keep parent's priority in sync
- Assign important issues to the project lead
