

Assign important issues to the project lead

On this page

[Configuration steps](#) | [Target issue*](#) | [Fields](#) | [Run as*](#) | [Conditional execution](#) | [Related example](#)

Use case

Automatically **assign** and issue to the **project lead**.

Issues will **only** be re-assigned if the **priority** of the issue is set to **Highest** to make sure that only important issues are being escalated.

Configuration steps

1

Target issue*

Select **current issue**.

The **current issue** will be updated.

2

Fields

1

Select **Assignee**.

2

Set the **Value*** to **Set field value manually (parser expression)** and insert the following expression:

```
%{issue.project.lead}
```

The **assignee** will be set to the **project lead**.

3

Run as*

Choose which **user*** will be able to execute the post function. By default, it is set to the Current user.

4

Conditional execution

Insert the following expression:

```
%{issue.priority} = "Highest"
```

The post function will **only** be executed **if** the **priority** of the issue is set to **Highest**.
