dayOfTheWeek()

This function returns the **day of the week** of **any given timestamp.**

Syntax

```
dayOfTheWeek(timestamp, timeZone) #Output: Number
```

Examples

Parser expression	Description
`%{dayOfTheWeek({issue.dueDate}, RUN_AS_LOCAL)}`	This example will return the **day** part of the issue's due date. If the due date was set to **April 21st, 2020 00:00** the output would be **3** since this day is a **Tuesday**.

Additional information

Parameters used in this function

Parameter	Input (data type)	Description
`timestamp`	NUMBER	The parameter must be a valid **timestamp**. Usually this value is retrieved from a field (e.g. due date, created date).
`timeZone`	TEXT	The **time zone** used for the calculation.

Days might depend on the **time zone** - it might be Sunday on the west coast of the US while at the same time it's already Monday in Australia.

Output

This function returns a NUMBER where **Sunday = 1**, **Monday = 2**, ... **Saturday = 7**.
