

toNumberList()

This function **converts** a comma-separated **text** containing numbers to a **number list**.

Syntax

toNumberList(text) #Output: Number list

Examples

Parser expression	Description
<pre>%{toNumberList("1, 3, 5 , 7, 11, 13")}</pre>	This example returns the following number list: 1, 3, 5, 7, 11, 13
<pre>%{toNumberList(%{issue.components.id})}</pre>	In case the issue has the components "Frontend" and "Backend" with the respective IDs 10001 and 10002, this example returns the following number list: 10001, 10002

Additional information

Parameters used in this function

Parameter	Input (data type)	Description
text	TEXT	Any comma-separated text satisfying the format: "Element1, Element2".

Output

This function returns a

NUMBER LIST

Variant where you can additionally define custom **separators**.

Leading and trailing spaces around each list element are automatically removed.

Syntax

toNumberList(text, separators) #Output: Number list

Examples

Parser expression	Description
<code>%{toNumberList("1, 3? 5; 7; 11; 13", ",?;")}</code>	This example returns the following number list: 1, 3, 5, 7, 11, 13

Additional information

Parameters used in this function

Parameter	Input (data type)	Description
text	TEXT	Any text containing numbers in decimal representation (e.g. "1, 2, 3") , separated by one of the characters defined in the second parameter.
separators	TEXT	Any separator characters.

Output

This function returns a
