

lastDayOfTheMonth()

This function returns a **number** representing the **timestamp** for the last day of the month of a given **timestamp** in a specific **time zone**.

The timestamp returns 00:00 i.e., the very beginning of the last day.

Syntax

```
lastDayOfTheMonth(timestamp, timeZone) #Output: Number
```

Examples

Parser expression	Description
<code>lastDayOfTheMonth(2020/02/05 11:31, LOCAL)</code>	This example returns: 2020/02/28 00:00 .
<code>lastDayOfTheMonth({issue.created}, LOCAL)</code>	This example returns the timestamp of the last day of the month an issue was created .

Additional information

Parameters used in this function

Parameter	Input (data type)	Description
timestamp	NUMBER	The parameter must be valid timestamp . Usually this value is retrieved from a field (e.g. due date, created date).
timeZone	TIMEZONE	The time zone used for the calculation.

Work days might depend on the **time zone** - it might be Sunday on the west coast of the US while at the same time it's already Monday in Australia.

Output

This function returns a
