

isInGroup()

This function checks if a **user** or group of users are **members** of a **group**.

Multiple user names can also be provided in a comma-separated list of **user names**, **group names** or **role names**. In that case, the function will return **true** only if all users in the list, groups of the list, and in the roles of the list, are in the given project role for the current project.

Syntax

isInGroup(users, group) #Output: Boolean

Examples

Parser expression	Description
<code>isInGroup(%{issue.assignee}, "jira-developers")</code>	The function returns true if the assignee is in group jira-developers .

Additional information
