

All sub-tasks must be resolved

On this page

[Configuration](#) | [Screenshots](#) | [Related use cases](#)

Use case

This simple use case ensures, that **all sub-tasks** of the current issue are **resolved**.

You can either **hide** the transition using the [Condition on sub-tasks](#) or **block** the transition using the [Validation of sub-tasks](#).

Configuration

1

Add the **condition** or the **validator** to the desired transition or create a new transition.

2

Filter by issue type

Choose **sub-task**

3

Filter by status

Choose the desired sub-task status you want to evaluate, e.g., **"Done"**.

4

Filter by resolution

Choose the desired **resolution(s)**, e.g. **"Done"**

The following parameters are **only available**, if you are configuring this use case as a **validator**.

Validator only

1

Error message

There are unresolved sub-tasks, please resolve all sub-tasks before proceeding with this issue.

[Update parameters of the Condition on sub-tasks Condition for this transition.](#)

Update parameters of the Condition on sub-tasks Condition for this transition.

Basic configuration *

Filter by issue type *

Sub-task x

Only issues matching the selected issue types will be evaluated.

Filter by status *

Done x

Only issues matching the selected statuses will be evaluated.

Filter by resolution *

Done x

Only issues matching the defined resolutions will be evaluated.

Filter by field value

1

Only issues where the field values match the provided logical expression are allowed.

Minimum number of sub-tasks *

0

Specify the minimum number of sub-tasks that need to satisfy the specified filter criteria.

Maximum number of sub-tasks *

1000

Specify the maximum number of sub-tasks that need to satisfy the specified filter criteria.
