

All sub-tasks in the Closed status must have a specific resolution

On this page

[Configuration](#) | [Screenshots](#) | [Related use cases](#)

Use case

This use case ensures, that **all sub-tasks**, which are in the **Closed status** must have a resolution of e. g. **Done**.

You can either **hide** the transition using the [Condition on sub-tasks](#) or **block** the transition using the [Validation of sub-tasks](#).

Configuration

1

Add the **condition** or the **validator** to the desired transition or create a new transition.

2

Filter by status

Choose **Closed**

3

Filter by resolution

Choose the desired resolution, e.g. **Done**

Additional options

4

Allow unselected issue types

Check this option to skip the issue type filter.

5

Allow unselected statuses

Check this option.

Checking this option ensures that issues in other statuses are **not** being **considered / analyzed** since you only want to analyze issues in the **Closed** status.

The following parameters are **only available**, if you are configuring this use case as a **validator**.

Validator only

1

Error message

There are sub-task in the Closed status that have not been fixed.

Screenshots

Update parameters of the Condition on sub-tasks Condition for this transition.
Update parameters of the Condition on sub-tasks Condition for this transition.

Basic configuration *

Filter by issue type

Sub-task x

Only issues matching the selected issue types will be evaluated.

Filter by status

Closed x

Only issues matching the selected statuses will be evaluated.

Filter by resolution *

Done x

Only issues matching the defined resolutions will be evaluated.

Filter by field value

1

Only issues where the field values match the provided logical expression are allowed.

Minimum number of sub-tasks *

0

Specify the minimum number of sub-tasks that need to satisfy the specified filter criteria.

Maximum number of sub-tasks *

1000

Specify the maximum number of sub-tasks that need to satisfy the specified filter criteria.

Additional options

☒ Allow unselected issue types

Sub-tasks of unselected issue types will be allowed regardless of their state. This option must be checked, if the issue type filter should be ignored.

☒ Allow unselected statuses

Sub-tasks in unselected statuses will be allowed regardless of their state. This option must be checked, if the status filter should be ignored.

☐ Allow unselected resolutions

Sub-tasks with unselected resolutions will be allowed regardless of their state. This option must be checked, if the resolution filter should be ignored.

☐ Allow unsatisfied field value filter

Sub-tasks not matching the defined field values will be allowed regardless of their state. This option must be checked, if the field value filter should be ignored.
