Hide transition from issue creator

Use case

This use case ensures, that a transition is hidden for the **creator** of an issue. Place this condition on an **approval transition** to prevent a user from approving his own requests.

⚙ Configuration

(1) Add the condition to the desired transition or create a new transition.

(2) **Field**

Choose **Creator**

Screenshots

Update parameters of the Except users in a field Condition for this transition.

Update parameters of the Except users in a field Condition for this transition.

Basic configuration *
Define the required parameters for this condition.

Field *

Creator

Select the field containing the users. Text fields should contain a single or comma separated list of user names or group names.
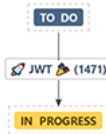

Except users in a field

Documentation

Prevent users or groups stored in a field from executing the transition.
