

# Copy highest priority from linked issues

On this page

[Configuration](#) | [Screenshots](#) | [Related use cases](#)

## Use case

This use case helps to get the **highest priority** from all **non-closed blocking issues**.

So if there is a blocking issue with a higher priority than the current one, the priority will be updated to that value.

The priority will only be copied if the linked issue is in status **To Do**, **Open**, or **In Progress**.

## Configuration

1

Add the [Copy field values from linked issues or subtasks](#) post function to the desired transition or create a new transition.

2

### Target fields

Choose **Priority**

1

#### Value

Choose **Copy field value from issue**

2

#### Field

Choose **Priority**

3

#### Calculated value

Choose **Highest priority**

3

### Filter

1

#### Filter by link type

Choose **is blocked by**

#### Filter by status
