

Copy latest due date from sub-tasks

On this page

[Configuration](#) | [Screenshots](#) | [Related use cases](#)

Use case

In the following use case the **latest due date** from the current **sub-tasks** will be copied to the current issue.

Configuration

1

Add the [Copy field values from linked issues or subtasks](#) post function to the desired transition or create a new transition.

2

Target fields

Choose **Due date**

1

Value

Choose **Copy field value from selected issues**

2

Field

Choose **Due date**

3

Calculated value

Choose **Latest date**

3

Additional options

Check **Include sub-tasks matching the specified filter criteria**

Update parameters of the Copy field values from linked issues or sub-tasks Function for this transition.

Update parameters of the Copy field values from linked issues or sub-tasks Function for this transition.

Basic configuration *

Define the required parameters needed to execute this post function.

Fields *

Select the fields that will be updated and the corresponding source values of the linked issues or sub-tasks.

Field	Value	Calculated value	Write protection
<div><div></div>Due date</div>	Field in selected issue	DUE DATE	Latest date
Add field			

Filter

Filter by project

Any project

Only issues matching the selected projects will be processed.

Filter by link type *

Select link types

Only issues matching the selected link types will be processed.

Filter by issue type

Select issue types

Only issues matching the selected issue types will be processed. Leave blank to skip this filter.

Filter by status

Select statuses

Only issues matching the selected statuses will be processed. Leave blank to skip this filter.

Filter by field value

1

Only issues matching the defined field value will be processed. Leave blank to skip this filter.

Additional options

- ☒ Include sub-tasks matching the specified filter criteria.

This option only makes sense when the current issue itself is not a sub-task.
- ☐ Include sibling sub-tasks matching the specified filter criteria.

Sibling sub-tasks are sub-tasks with the same parent as the current issue. This option only makes sense when the current issue itself is a sub-task.
- ☐ Include recursively linked issues or sub-tasks matching the specified filter criteria.

Recursively linked issues or sub-tasks (e.g. which are linked to a directly linked issue) will also be included independent of the linking depth.
- ☐ Include current issue.

The value of the current issue will be included in the output.
- ☐ Update issue immediately

Each field update results in a dedicated "Issue Updated" event and issue history entry.
