

Remove blocking links when blocking issue is closed

On this page

[Configuration](#) | [Screenshots](#) | [Related use cases](#)

Use case

Issue links can be used to show relations between different issues. The **blocks** and **is blocked by** links can be used to indicate that an issue is depending on another one.

In the following use case those links will be **removed once the blocking issue is closed**.

Configuration

1

Add the [Delete issue link](#) **post function** to the desired transition or create a new transition.

You might want to place the post function on the **transition that is used to close the issue**.

2

Source issues

Choose **Current issue**

3

Advanced filters

1

Filter by link type

Choose **blocks (Blocks)**

Optionally, you can use the **conditional execution** to only delete the issue link, if a specific resolution was set on the blocking issue.

4

Conditional execution

E.g., you could use the following expression:

```
%{issue.resolution} = "Fixed"
```

In this case, the issue link will only be deleted, if the **resolution "Fixed"** was set on the **blocking issue**.

Update parameters of the Delete issue link Function for this transition.

Update parameters of the Delete issue link Function for this transition.

Basic configuration *

Define the required parameters needed to execute this post function.

Source issues *

Current issue

Select the source issues to delete the issue links from.

Advanced filters

Optionally apply filters to define the issue links to be deleted.

Filter by link type

blocks (Blocks) X

Only issues matching the selected link types will be processed. Leave blank to skip this filter.

Filter by issue type

Select issue types

Only issues matching the selected issue types will be processed. Leave blank to skip this filter.

Filter by status

Select statuses

Only issues matching the selected statuses will be processed. Leave blank to skip this filter.

Filter by destination issue

Select issues

Only issues matching the selected issues will be processed. Leave blank to skip this filter.

Additional options

Conditional execution

The post function will only be executed if the following condition (a logical expression) is met.

Expression

1 `%{issue.resolution} = "Fixed"`

The expression must return true or false.

Run as

Delete issue link

Documentation

Delete one or multiple issue links.
