

# Proceed with a task only when all sub-tasks are completed

On this page

[Configuration](#) | [Screenshots](#) | [Related use cases](#)

## Use case

Proceed with a task only when all sub-tasks are completed.

### Configuration

1

Add the [Validation of sub-tasks](#) to the desired workflow transition.

2

#### Filter by status

Select **Resolved** and **Closed**.

### Additional options

Check the following options:

3

#### Allow unselected issue types

Checking this option allows you to skip the issue type filter.

4

#### Allow unselected resolutions

Checking this option allows you to skip sub-tasks with resolutions.

### Screenshots

Update parameters of the 'Validation of sub-tasks' Validator for this transition.

Update parameters of the 'Validation of sub-tasks' Validator for this transition.

Basic configuration \*

Filter by issue type

Select issue types

Only issues matching the selected issue types will be evaluated.

Filter by status \*

Resolved x Closed x

Only issues matching the selected statuses will be evaluated.

Filter by resolution

Select resolutions

Only issues matching the defined resolutions will be evaluated.

Filter by field value

1

Only issues where the field values match the provided logical expression are allowed.

Minimum number of sub-tasks \*

0

Specify the minimum number of sub-tasks that need to satisfy the specified filter criteria.

Maximum number of sub-tasks \*

1000

Specify the maximum number of sub-tasks that need to satisfy the specified filter criteria.

Additional options

- ☒ **Allow unselected issue types**  
Sub-tasks of unselected issue types will be allowed regardless of their state. This option must be checked, if the issue type filter should be ignored.
- ☐ **Allow unselected statuses**  
Sub-tasks in unselected statuses will be allowed regardless of their state. This option must be checked, if the status filter should be ignored.
- ☒ **Allow unselected resolutions**  
Sub-tasks with unselected resolutions will be allowed regardless of their state. This option must be checked, if the resolution filter should be ignored.
- ☐ **Allow unsatisfied field value filter**  
Sub-tasks not matching the defined field values will be allowed regardless of their state. This option must be checked, if the field value filter should be ignored.
