Add attachments from current issue to cloning issues

On this page

Use case

Issue links in Jira are a helpful tool to keep track of changes throughout different issues.

In the following use case **attachments** that were added to the **current issue** will also be **copied** to all **cloning issues**.

⚙ Configuration

1   Add the Update linked issue or sub-task post function to the desired transition or create a new transition.

2   **Fields**

    1   Click on **Add field**.

        Choose **Attachments (only new attachments will be added)**

    2   **Value**

        Choose **Copy field value form current issue**

    3   **Field**

        Choose **Attachments**

3   **Filter**

     Update the following filters according to your needs.

    1   **Filter by link type**

        Choose **is cloned by**

2

Filter by status

Choose **To Do, Open, In Progress**
