All blocking issues must be resolved

On this page

Use case

In the following use case the transition can only be executed, if all **blocking issues** are resolved with the resolution **Fixed** or **Done**.

⚙ Configuration

1 Add the condition or validator to the desired transition or create a new transition.

2 **Filter by link type**

Choose **is blocked by**

You might want to update the link type according to your needs.

3 **Filter by resolution**

Choose **Fixed, Done**

You might want to update the resolutions according to your needs.

4 **Filter by project**

Choose **Any project**

5 **Additional options**

Check the following options:

- Allow unselected link types
- Allow unselected issue types
- Allow unselected statuses

The following parameters are **only available**, if you are configuring this use case as a **validator**.

Validator only

1 **Error message**

```
All blocking issues must have a resolution of Fixed or Done.
```

Update parameters of the Condition on linked issues Condition for this transition.

Update parameters of the Condition on linked issues Condition for this transition.

Basic configuration *
Define the required parameters for this condition.

Filter by link type *

is blocked by (Blocks) ✕

Only issues matching the selected link types will be evaluated.

Filter by issue type *

Select issue types

Only issues matching the selected issue types will be evaluated.

Filter by status *

Select statuses

Only issues matching the selected statuses will be evaluated.

Filter by resolution *

Fixed ✕   Done ✕

Only issues matching the defined resolutions will be evaluated.

Filter by project

Any project

Filter by field value

✓ 🔧 1

Only linked issues where the field values match the provided **logical expression** are allowed.

Minimum number of linked issues *

0

Specify the minimum number of linked issues that need to satisfy the specified filter criteria.

Maximum number of linked issues *

1000

Specify the maximum number of sub-tasks that need to satisfy the specified filter criteria.

Additional options

☑ **Allow unselected link types**
Linked issues with unselected link types will be allowed regardless of their state. This option must be checked, if the link type filter should be ignored.

☑ **Allow unselected issue types**
Linked issues of unselected issue types will be allowed regardless of their state. This option must be checked, if the issue type filter should be ignored.

☑ **Allow unselected statuses**
Linked issues in unselected statuses will be allowed regardless of their state. This option must be checked, if the status filter should be ignored.

☐ **Allow unselected resolutions**
Linked issues with unselected resolutions will be allowed regardless of their state. This option must be checked, if the resolution filter should be ignored.

☐ **Allow unsatisfied field value filter**
Linked issues not matching the defined field values will be allowed regardless of their state. This option must be checked, if the field value filter should be ignored.
Condition on linked issues

Documentation ↗

Evaluate the current state (type, status, number, etc.) of issue links.
