Make the description required

## Use case

In the following use case the transition can only be executed, if there is a description for that issue.

⚙ Configuration

1 Add the condition or validator to the desired transition or create a new transition.

2 **Field**

Choose **Description** and select **is required**

The following parameters are **only available**, if you are configuring this use case as a **validator**.

Validator only

1 **Error message**

```
Please enter a description.
```
