

Make "Time spent" field required

On this page

[Configuration](#) | [Screenshots](#) | [Related use cases](#)

Use case

In the following use case the transition can only be executed, if there was time logged on the current issue.

Configuration

1

Add the validator to the desired transition or create a new transition.

2

Expression

Enter the following expression:

```
{issue.timeSpent} > 0
```

3

Error message

Enter the following message in **basic text** mode:

There must be time logged on this issue in order to proceed.

Screenshots

Update parameters of the 'Logical validator' Validator for this transition.

Update parameters of the 'Logical validator' Validator for this transition.

Basic configuration *

Define the required parameters for this validator.

Expression*

The expression must return `true` or `false`. The condition is met if the logical expression returns `true`.

Validation options

Error message

Add an **optional** error message to show when a validation fails.

Location

Show on top

Define where the error message should be displayed.

Message

1

 There must be time logged on this issue in order to proceed.

Enter plain text and optionally use **field codes**, e.g. `%{issue.summary}`, to insert field values.

Add translation

Add **optional** error message translations. Translations will be displayed based on the user's language setting.

Logical validator

Documentation

Evaluate a logical expression that returns true or false - a most universal and powerful function to compare field values across any kind of issue relation, count sub-tasks or links.
