

# Keep parent issue's priority in sync

On this page

[Configuration](#) | [Screenshots](#) | [Related use cases](#)

## Use case

Whenever the following post function gets executed, the parent's issue priority will be set to the current issue's priority.

### Configuration

1

Add the [Update or copy field values](#) post function to the desired transition or create a new transition.

2

#### Target issue

Choose **Parent issue**

3

#### Fields

Choose **Priority**

4

#### Value

In the **popup**, choose **Copy field value from current issue**

5

#### Field

Choose **Priority**

### Screenshots

Update parameters of the Update or copy field values Function for this transition.

Update parameters of the Update or copy field values Function for this transition.

Basic configuration \*

Define the required parameters needed to execute this post function.

Target issue \*

Parent issue

Select the issues to be updated.

Fields \*

Define the fields to be updated.

| Field     | Value                  | Write protection |
|-----------|------------------------|------------------|
| Priority  | Field in current issue | PRIORITY         |
| Add field |                        |                  |

- Additional options
- Conditional execution
- Run as

### Update or copy field values

Documentation

Update one or multiple issue fields or copy field values across the same issue or related issues (parent / child, Epic / Story, linked issues and many more).

#### Workflow

JWT 3.0.0 Use cases

```
graph TD; A[TO DO] --> B[JWT (1471)]; B --> C[IN PROGRESS];
```

#### Examples

Pick one of the following example configurations and get started in no time. More details will be provided upon your selection.

- Assign issue to current user
- Keep parent's priority in sync
- Assign important issues to the project lead
