

# Sprint ID

Field code
<code>%{issue.sprintId}</code>

Read

Returned value	ID of the current issue's <b>sprint</b>
Output data type	<div>TEXT</div>
Example output	1

If the issue is assigned to an **active sprint**, the value of this sprint will be returned.

If the issue is related to **several sprints**, the value from the currently active sprint will be returned.

If the issue is related to **several sprints** and all **sprints are inactive**, the value from the sprint completed most recently will be returned.
