

Project lead's full name (trigger)

Field code

```
%{trigger.project.leadDisplayName}
```

Read

| | |
|------------------|--|
| Returned value | Full name of the project lead of the project triggering the event |
| Output data type | <input type="text" value="TEXT"/> |
| Example output | Bob Smith |

This field code is **only available** for [JWT automation rules](#) since several events can trigger the execution of a rule.

Automation-only field codes can additionally retrieve information from the trigger event (e.g. the version being updated, the user triggering the event, etc.)
