

# User full name

| Field code                            |
|---------------------------------------|
| <code>%{trigger.user.fullName}</code> |

Read

|                  |                                                   |
|------------------|---------------------------------------------------|
| Returned value   | Full name of the <b>user</b> triggering the event |
| Output data type | <div>TEXT</div>                                   |
| Example output   | Bob Smith                                         |

This field code is **only available** for [JWT automation rules](#) since several events can trigger the execution of a rule.

**Automation-only** field codes can additionally retrieve information from the trigger event (e.g. the version being updated, the user triggering the event, etc.)
