

Version sequence

Field code
<code>%{trigger.version.sequence}</code>

 Read

Returned value	Sequence number of the version from the event 
Output data type	TEXT
Example output	1

The **sequence number** represents the order of your versions starting with 1 for the bottom one.

This field code is **only available** for [JWT automation rules](#) since several events can trigger the execution of a rule.

Automation-only field codes can additionally retrieve information from the trigger event (e.g. the version being updated, the user triggering the event, etc.)
