Display historic due dates

Use case

This calculated field returns a comma-separated list of the issue's **previous due dates**.

⚙️ Configuration

1 Create a new **Calculated Text Field (by JWT)** custom field and name it properly.

> Providing a description will help you to identify what the custom field does but this step is **optional.**

2 **Parsing mode**

Select **Advanced text** as parsing mode.

3 **Parser expression**

Add the following expression:

| Text to be parsed for calculated text field: |
| --- |
| `toString(textOnNumberList(fieldHistory({issue.dueDate}),dateToString(^, LOCAL, USER_LANG)))` |

4 **Add** the field to the relevant view **screens.**
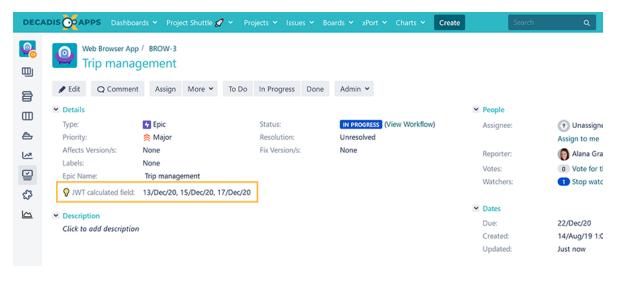

> **Remember**: All calculated fields are **read-only** and cannot be manually updated on a create or edit screen.
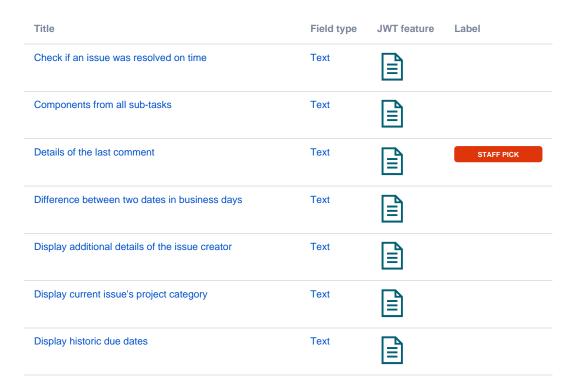

5 **Check the results**

Once configured and added to an issue screen, the result will look like this:

Default Configuration Scheme for 💡 JWT calculated field

Default configuration scheme generated by Jira

Applicable contexts for scheme: Edit Configuration

       Issue type(s):

           Global (all issues)

Expression:

```
toString(textOnNumberList(fieldHistory({issue.dueDate}
ToString(^, LOCAL, USER_LANG)))
```

Edit expression

Mode: Advanced text
